

KIDAFTARI ERP

# COMPANY PROFILE

THE ERP THAT RECORDS BUSINESS  
AS IT HAPPENS

[WWW.KIDAFTARI.COM](http://WWW.KIDAFTARI.COM)

# DEFINING OUR PURPOSE

## Mission

To help African businesses achieve accurate financial records by automating how payments and transactions are recorded in real time.

## Vision

A future where every African business has accurate, real-time financial records by default — not by effort.

# WHY CHOOSE KIDAFTARI ERP

**Because accounting should happen as your business happens.**

Most businesses struggle with incomplete records not because they lack systems — but because payments are recorded late, manually, or incorrectly.

**Kidaftari is built differently.**

**We combine payments, accounting, and operations into one live system, so transactions are captured and classified the moment money moves — not weeks later.**

**This gives our customers something rare in African business today: near-accurate books throughout the year.**

# WHAT MAKES KIDAFTARI DIFFERENT

---

## ◆ Payments at the Core

Unlike traditional ERPs, Kidaftari integrates payments directly into accounting.

Receipts and payments are recorded automatically — reducing reconciliation work and human error.

## ◆ 80–90% Accurate Books by Default

Our customers achieve up to 80–90% accounting accuracy during the year because transactions are captured as they happen, not reconstructed at month-end or audit time.

## ◆ Built for Real African Businesses

Kidaftari is designed from real Kenyan and African business operations — manufacturing, inventory-heavy businesses, and SMEs — not adapted from foreign models.

## ◆ Less Manual Work, More Control

Accountants and finance teams spend less time chasing receipts and reconciling payments, and more time analyzing, advising, and making decisions.

## ◆ One System, One Source of Truth

Inventory, sales, payments, and accounting all flow into one platform — giving management clear, reliable numbers they can trust.

## ◆ Client Proof

“With payment integration on Kidaftari, our books are now about 80–90% accurate during the year because transactions are recorded as they happen.” — **Kings Mabati**

# TAILORED SERVICES FOR GROWTH

---

## Inventory & Warehouse Management

Track stock in real time, manage reorder points, and sync multiple branches seamlessly.

## Manufacturing

Intelligently manage your production process ensuring proper stock tracking and costing

## Accounting & Financial Reports

Generate P&L, statements, ageing, and cost tracking reports instantly.

## Customer & Supplier Management

Handle invoices, purchases, receipts, ageing reports, and manage debts efficiently.

## E-TIMS

We seamlessly integrate your ETIMS account onto your Kidaftari account for easy VAT reporting

## KiLipo Wallet

Run your operations on mobile and reconcile payments automatically.

# MEET KiLipo – Integrated Payments

The inbuilt wallet that connects payments and accounting in one system.

## What is KiLipo?

KiLipo is Kidaftari ERP's built-in payments wallet that allows businesses to pay suppliers and manage expenses directly from the system.

Every payment made through KiLipo is automatically recorded in the accounting module, ensuring **real-time accuracy** and **eliminating manual reconciliations**.

**KiLipo** removes these inefficiencies by bringing payments and accounting into one **secure platform**.

## How KiLipo Works

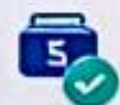

- 1 Load funds into your **KiLipo wallet**
- 2 **Initiate** supplier or expense payments from Kidaftari
- 3 Payment is processed securely via integrated PSPs
- 4 Transaction is **automatically** recorded in the system
- 5 Real-time reports are instantly updated

## What You Can Do with KiLipo

### Pay Suppliers Directly

Make supplier payments from within Kidaftari ERP.

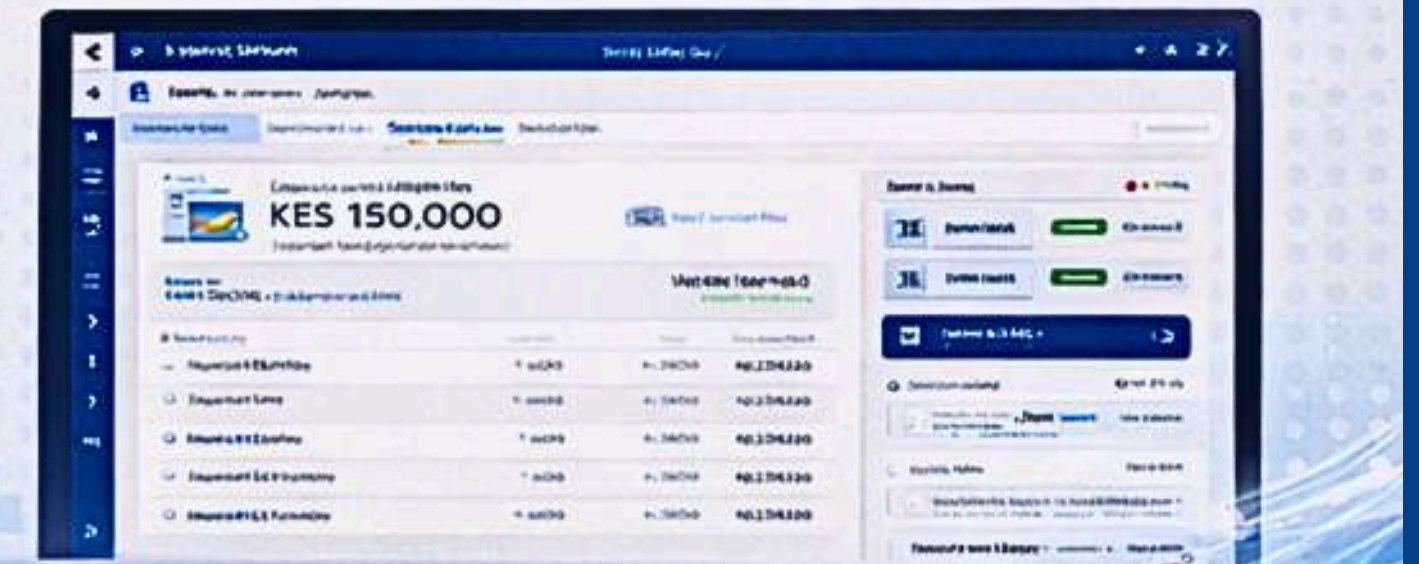

### Manage Business Expenses

Pay for operational expenses without leaving the system.

## Why Businesses Choose KiLipo

- Eliminates manual reconciliation
- Reduces petty cash risks
- Saves time and operational costs
- Improves financial accuracy
- Ensures real-time visibility of cash flow
